

**Amendments to the Specification:**

After the title and before the subheading entitled Field of the Invention, please include the following information:

**--Related Application Information--**

This application is a divisional application of U.S. Patent Application Serial No. 10/177,610, filed on June 19, 2002, the contents of which are herein incorporated by reference--

Please replace paragraph [0025] with the following amended paragraph:

[0025] The embodiment of Fig. 2 also comprises ~~to~~ two segments, a segment that will be used to form the top of the completed container and a second segment that is used to form the bottom, or holder portion of the completed container. The portion forming the bottom or holder of the container suitably comprises generally rectangular surfaces denoted A, A', B, B', C, C'; D, E, F, F', G and H. The surfaces are separated and/or delineated by cuts or scores and define the bottom, front, back and sides of the holder portion of the container as well as closure flaps and reinforcements. The surface D defines the bottom of the container and is separated from the front and back faces (E and H, respectively) by scores or creases 130 and 132. The side flaps, A, B, C and F, are also delineated from the front, back and bottom surfaces by elongated scores 133 and 134 and are separated from one another by cuts.

Please replace paragraph [0041] with the following amended paragraph:

[0041] In the exemplary embodiment of Fig. 23 3, an exemplary golf ball container is illustrated which is also formed of a corrugated cardboard blank defined by a corresponding stamping dye that presses against a single, unitary piece of cardboard, and cuts out the perimeter of the blank, forming the scores, holes and other cuts, as described above. The corrugated cardboard material suitably comprises a smooth outer kraft liner, an interior corrugated layer or medium, and an inside kraft liner.
